

Typing Pong

Game Identity

A fast-paced competitive typing game that combines Pong physics with typing accuracy, combos, and arcade-style customization.

Design Pillars

Fast: Players type quickly while the ball is moving.

Competitive: Players race for the highest score.

Skill-based: Success requires typing accuracy and paddle positioning.

Genre / Mechanics Summary

Genre: Arcade / Typing / Competitive Multiplayer. The game combines classic Pong with a real-time typing challenge. The ball moves continuously, bounces off the top and bottom walls, and can travel at different angles. When the ball travels toward a player, a word appears on it. The player types the word before the ball reaches their paddle. Correct typing puts the paddle into a **READY** state; the paddle then successfully returns the ball. An incorrect or late answer causes the ball to pass the paddle and gives the opponent a point. Matches last **60 seconds**. Consecutive perfect hits build a combo, and five perfect hits activate **Fire Mode**.

Features

- Pong-style diagonal ball physics and wall bounces
- Words displayed directly on the moving ball
- Real-time typing challenge + paddle positioning
- 60-second competitive matches
- Combo system and 5-perfect-hit Fire Mode
- Extra typing time, Invisible ball, Big paddle, Defense wall
- Customizable paddles and boards
- Leaderboards for score, accuracy, typing speed and highest combo

Interface

- **Platform:**
 1. PC / Web
- **Controls:**
 1. keyboard for typing.
 2. Arrow up and down for moving the paddle

Art Style

Clean modern arcade + neon/tech aesthetic. Inspired by the simplicity of Pong, the energetic effects of Geometry Dash, The arena stays visually clear so the ball, word and paddle are always readable

Core loop: The core loop for this game will be (type -> move the paddle)
